

AltoSling

Active-Fit stand-aid sling

With its padded back support, the Active-Fit provides comfort and stability when the patient really needs it. This sling features a wider cut and strong polycarbonate stays to give rigidity in the spinal area. The Active-Fit product has a true feeling of luxury, whilst providing protection and peace of mind for both the patient and carer when carrying out a standing transfer. All labels are embroidered making them more resilient to the washing process.

Please note that the AltoSlings Active-Fit Sling is specifically designed for use with a stand assist hoist.

This product is available in sizes between X Small and XX Large, all of which have a safe working load of 200kg.

Order Code: S1090 (Loop fixing)
S1091 (Clip fixing)
