

STREAM

3-in-1 solution for showering, toileting & bathing

The Stream is a highly flexible solution for mobile and hoisted transfers, toileting, showering and bathing.

Offering superb comfort and support in four frame sizes, from paediatric to adult, the Stream promises to revolutionise the way shower and bathing transfers occur.

The stainless steel frame provides a mobile base for all of the cradles, and with its on-board battery pack allows the user to be easily tilted for safety and comfort. The base frame moves on four locking castors. The cradle has a zipped mesh upholstery which allows excellent drainage for showering, superb comfort and support, and can be easily removed for laundering or replacement.

The cradle frame has four discreet and covered lifting points, allowing the cradle with a client to be effortlessly lifted by a mobile or ceiling track hoist. The cradle can be placed with an additional frame into a bath to provide a safe in-bath support.

Various accessories are available to ensure comfort and support for any user.
