

Valencia Air

Contemporary chair
with tilt-in-space
and recline functions

Electric specialist chair combining tilt-in-space and recline, suitable for users with a broad range of conditions including Huntington's disease.

The Valencia Air chair brings solutions that other chairs cannot. Having the benefit of both tilt-in-space and recline, this chair has endless positioning capabilities.

Features and benefits

- Tilt in space function
- Backrest recline
- Battery operated, allowing use anywhere in the home
- Highly adjustable seating system, giving optimum support
- Mobile – even with the user in the chair
- Market leading pressure reducing properties

We have proved that the Valencia Air chair is suitable for users with many different conditions, and because of a strengthened frame it can be recommended for clients with Huntingdon's disease.

Featuring an adjustable backrest, you will enjoy the support this chair delivers, and have the peace of mind that the lateral system is always adjustable for any future changes required. As standard the Valencia Air chair has an integral air overlay, which coupled with the memory foam cushion makes an extremely comfortable seat.

Free onsite assessment is offered with the Valencia Air, where our advisors will work with you to deliver a solution that will give lasting comfort and support.
