Trekker

Supportive modular seating you can take anywhere

The Trekker has been specially designed for long-term wheelchair users who need the support of a companion.

The Trekker is versatile, reusable, and extremely comfortable. The multifunctional chassis has a large seat-tilt range (0-30 degrees) and forms a stable basis for the various drive and construction variants.

Features and benefits

- Crash tested and can be used in Wheelchair accessible vehicles
- Highly adjustable
- Supportive and pressure reducing seating options that can be upgraded in future easily
- Suitable for multi-user environments
- Optional AURA power support option
- Tilt in space action - (0-30 degrees)
- 12 Mth. Warranty
- 150kg SWL

Combining it with the Matrixx seat system creates even more room for customisation. The chair can be completely tailored to the individual user. This means a chair that is always comfortable to sit in and easy to operate manually or propel by foot.

The Trekker can be combined with the AURA push support unit, a battery powered hub with a convenient speed control lever mounted on the push handle.

The optional AURA unit provides the motive power whilst the attendant provides the steering input, making a convenient combination for carers with a concern over manual handling. For ultimate comfort, you can opt for the Kelvin cushion system – our most quilted support system yet.

The Trekker is crash tested and suitable for use in wheelchair accessible vehicles.
